

HarmonyCode à Concept

HarmonyCode is a Pan-African creative-tech initiative fusing music, software engineering, and cybersecurity with on-site studios/labs and portal continuity.

The \$1.3M start round funds volume and depth of work, assessment integrity, live teaching and mentorship, facilitator capability, and proof outsiders respect (portfolios, placements, partners).

36-week arc: Sonic foundations; Software and responsible AI; Cybersecurity as self-defense; Capstone and systems. Unit depth unlocks after portal registration and subscription.
